

DEPARTMENT OF HOMELAND SECURITY
UNITED STATES COAST GUARD

FLAG STATE CONTROL IN THE UNITED STATES

2022 DOMESTIC ANNUAL REPORT

Rear Admiral Wayne R. Arguin

ASSISTANT COMMANDANT FOR PREVENTION POLICY
UNITED STATES COAST GUARD

I am pleased to present the U.S. Coast Guard's 2022 Flag State Control Annual Report to highlight the current status of the United States inspected fleet and U.S. Coast Guard activities to ensure safety, security, and environmental compliance. This report includes deficiency and detention rates for each type of inspected domestic vessel and performance metrics for Recognized Organizations that complete statutory activities on behalf of the Coast Guard. The numbers within were compiled using data from the Coast Guard Marine Information Safety and Law Enforcement (MISLE) database, which is used to record details about U.S. flag vessels, inspections, deficiencies issued, and reportable marine casualties.

Our Nation's security and prosperity are inextricably linked to a safe and efficient marine transportation system. The maritime environment continues to evolve and become more complex; offshore energy production, unmanned vessels and commercial space activities are rapidly expanding challenging the Coast Guard's existing regulatory and operational frameworks. The Coast Guard workforce remains committed to ensuring the safety and prosperity of our waterways.

In 2022, U.S. Coast Guard Marine Inspectors identified 30,633 deficiencies during 20,341 inspections on U.S. flagged vessels. In comparison to last year, the number of vessel inspections increased by 867 and the average number of deficiencies identified per inspection decreased from 1.6 to 1.5.

The phase-in period for 46 CFR Subchapter M came to an end in 2022, a historic occasion for both the commercial towing industry and the Coast Guard after almost two decades of work. The year was also focused on implementation of additional fire safety requirements for small passenger vessels and continued work modernizing our processes and industry outreach to prepare our workforce for the future.

Finally, I want to thank my dedicated Coast Guard workforce, recognized organizations, and vessel operators. I look forward to our continued partnership in ensuring our waterways remain safe.

The Office of Commercial Vessel Compliance (CG-CVC) reports statistics on foreign vessels trading in U.S. ports within the U.S. Port State Control Annual Report which can be found on the U.S. Coast Guard website: [CG-CVC Annual Reports](#)

Please direct all questions about this report to CG-CVC@uscg.mil

The background image is a photograph of a port scene, overlaid with a solid orange color. It shows a large ship being hoisted by a massive gantry crane. A smaller tugboat with the letter 'M' on its side is positioned to the left of the ship. The water shows a wake from the ship being moved.

CHAPTER

1

Report Overview

This report collates data from the Coast Guard's Marine Information Safety and Law Enforcement (MISLE) database regarding vessel population, inspections conducted, and deficiencies issued for the 2022 calendar year. The vessel populations used within this document are defined in the definitions appendix on page 30.

In 2022, the U.S. Flag fleet contained 19,189 vessels subject to inspection, with Coast Guard Marine Inspectors (MI) conducting 20,341 inspections.

The overall U.S. Flag fleet inspection total increased this year by 4%. Additionally, the number of deficiencies issued decreased by 2 % from the 2021 calendar year report.

FIGURE 1 | Inspections/Deficiencies

Domestic Fleet

In 2022, of the 20,341 inspections conducted by MIs, 30,633 deficiencies were identified on the 19,189 active vessels in the U.S. fleet of responsibility.

Figure 2 displays the number of U.S. inspected vessels of each type in calendar year 2022.

FIGURE 2 | Vessel Types

Figure 3 associates the number of inspections with the number of deficiencies for each vessel fleet.

FIGURE 3 | Inspections and Deficiencies

Figure 4 displays the ratio of deficiencies to the number of vessels for each fleet.

FIGURE 4 | Deficiencies/Vessel

Figure 5 displays the average age of the domestic fleet and for each vessel category.

FIGURE 5 | Average Age of Vessel Fleets

Domestic Marine Inspector Workforce

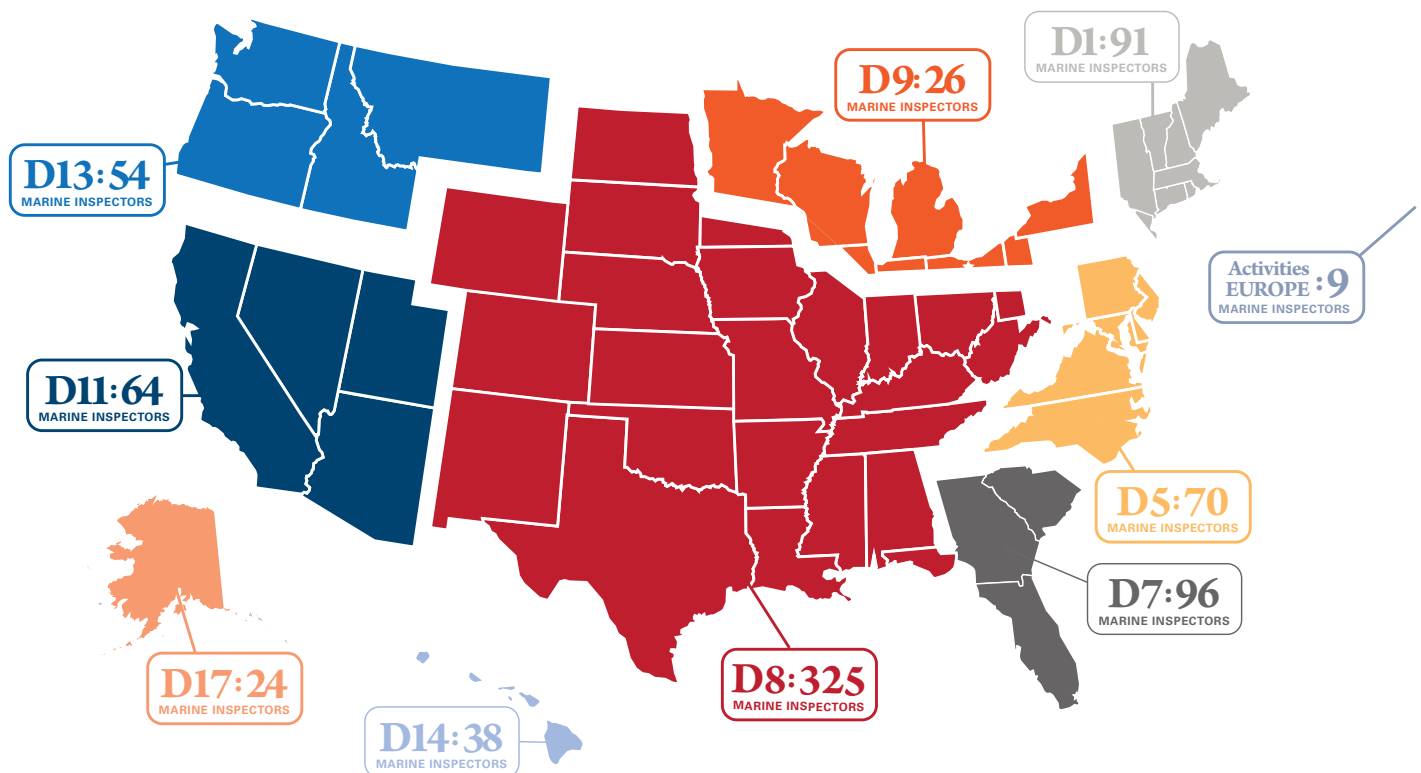

Marine inspectors trace their roots back to 1838 when Congress passed laws to improve the safety of steam-propelled vessels. Today, marine inspectors still examine steam propelled vessels and riveted steel hulls.

Additionally, these officers, warrant officers, enlisted, and civilian service members inspect new technology including ballast water and exhaust gas treatment systems to reduce the environmental impact of vessels, computer control systems to improve safety and efficiency, and advanced Liquefied Natural Gas (LNG), fuel cell, and battery propulsion systems.

The Coast Guard is committed to developing and maintaining a professional workforce that ensures certificated vessels, whether using old or new technology, remain safe for people, property, and the environment. All Coast Guard Marine Inspectors complete a comprehensive training program focused on meeting or exceeding industry and international standards.

These maritime professionals have an in-depth technical knowledge of the maritime transportation system including vessel components, policy, laws, and regulations.

FIGURE 6

Marine Casualties

There were 2,004 reportable marine casualties reported in 2022 involving 2,366 inspected vessels.

Figure 7 displays vessels involved in reportable marine casualties by vessel type.

FIGURE 7 | Percentage of Each Fleet Involved in Marine Casualties

VESSEL TYPE	FLEET SIZE	# OF REPORTABLE MARINE CASUALITIES	% OF FLEET INVOLVED IN A MARINE CASUALTY
Barge	4,977	312	6%
Cargo	554	273	49%
Passenger	6,686	560	8%
OCS	498	30	6%
R&SS	55	13	24%
Towing	6,419	1,178	18%

Figure 8 lists the top three reportable marine casualty types for each vessel fleet and the percentage that each represents compared to the marine casualty total for that type. For example, 50% of all barge reportable marine casualties were defined as collision, allision or grounding.

FIGURE 8 | Top Three Casualty Types

BARGE	CARGO	PASSENGER	OCS	R&SS	TOWING
Collision, Allision or Grounding 50%	Material Failure/ Malfunction 61%	Material Failure/ Malfunction 42%	Material Failure/ Malfunction 36%	Material Failure/ Malfunction 64%	Collision, Allision or Grounding 40%
Material Failure/ Malfunction 24%	Personal Casualty (Injury or Death) 16%	Personnel Casualty (Injury or Death) 24%	Collision, Allision or Grounding 24%	Personnel Casualty (Injury or Death) 9%	Material Failure/ Malfunction 25%
Personnel Casualty (Injury or Death) 7%	Loss/Reduction of Vessel Propulsion Steering 8%	Collision, Allision or Grounding 14%	Loss/Reduction of Vessel Propulsion/ Steering 16%	Collision, Allision or Grounding 9%	Loss/Reduction of Vessel Propulsion/ Steering 14%

Flag State Detentions

In 2022, there were 39 Flag State Detentions. Action code “30 – Ship Detained” is a control action that may be imposed on any inspected vessel type, including Small Passenger Vessels and Barges, and is selected when technical or operational-related deficiencies exist that individually or collectively indicate a serious failure, or lack of effectiveness, of the implementation of the Safety Management System (SMS). For vessels that do not have an SMS, “30 – Ship Detained” is assigned when objective evidence indicates that a serious substandard condition is not being proactively managed by the company, vessel owner, and/ or operator. Flag State detentions decreased from 71 (2021) to 39 (2022), a decrease of 45%. Flag State Detentions data is publicly displayed on the following webpage: [List of Flag State Detentions](#)

Figure 9 displays the total Number of Flag State Detentions in 2022 broken down by fleet.

FIGURE 9 | Flag State Detentions by Vessel Type

Recognized Organization (RO) and Third Party Organization (TPO) Performance Metrics

There are currently seven Recognized Organizations (ROs) that have been delegated authority to issue international certificates on behalf of the United States. Of the seven ROs, ABS, DNV, LR and Class NK are also authorized to participate in the Alternate Compliance Program (ACP) and the Maritime Security Program (MSP). Status of Classification Society Recognition, ACP Participation, and Authorizations Delegated by the U.S. Coast Guard Can be found here: [Class Society Authorization](#)

There are currently seven companies that may serve as TPOs under 46 CFR 139 Subchapter M: Towing Vessels. Furthermore, seven of the ROs may perform functions of a TPO under 46 CFR 139.110.

RECOGNIZED ORGANIZATIONS

ABS

DNV

Lloyd's Register (LR)

Nippon Kaiji Kyokai (Class NK)

Bureau Veritas (BV)

RINA S.p.A (RINA)

Indian Register of Shipping (IRS)

THIRD PARTY ORGANIZATIONS (TPO): 46 CFR 139 SUBCHAPTER M

Gallagher Marine Systems (GMS)

Inland Towing Operators Working Together (ITOW)

Quality Management International, Inc. (QMII)

International Register of Shipping (IRS)

Sabine Surveyors

Towing Vessel Inspection Bureau

WaveCrest, Inc.

The list of CG approved TPOs can be found here: [Subchapter M Third Party Organizations](#)

Flag State Control (CVC-4) Actions

Quality Cases involve Third Party Organizations (e.g. ROs, TPOs, etc.) that are entrusted by, and held accountable through agreements with the Coast Guard to perform certain functions such as marine inspections or audits on behalf of the Coast Guard. A Quality Case is issued to a Third Party Organization when the Coast Guard obtains objective evidence that suggests a possible lapse in a Third Party Organization's delegated functions. In 2022, there were eight Quality Cases issued, six were adjudicated, and two were dismissed.

In 2022 Flag State Control Officers attended 34 Document of Compliance audits.

The Coast Guard continues to capture and evaluate the data which will assist in appraising the performance of owners, operators, ROs and TPOs:

- Deficiencies that individually or collectively indicate a failure, or lack of effectiveness, of the implementation of the vessel's Safety Management System (SMS-related deficiencies).
- Flag State detentions related to any SMS-related deficiencies.
- Vessel or Company audits that are associated with SMS-related deficiencies.
- Deficiencies that constitute objective evidence of a potential failure of the RO's Quality Management System (QMS) in performing a delegated function.
- Quality Cases - In situations where it is determined by the Coast Guard that the RO failed to adequately perform delegated functions, the Coast Guard and RO will look at the cause of the failure and document the problem and any corrective action.

Key Performance Indicators (KPI)

The Coast Guard receives quarterly performance data from each Recognized Organizations (RO) detailing the number of surveys and audits conducted along with associated findings. A subset of the 2022 KPI data is reported below.

Figure 12 displays ROs attended 6,550 U.S. vessels to conduct statutory surveys in 2022 and issued 22,784 findings. Figure 13 displays a rate of 3.5 statutory findings per vessel attendance.

FIGURE 12 | Number of Vessels attended for Survey Reported by RO

FIGURE 13 | Findings per Vessel Survey

Figure 14 displays ROs attended 1,337 U.S. vessels to conduct Safety Management Certificate (SMC) related audits on behalf of the Coast Guard and issued 1124 findings. Figure 15 displays a rate of 0.8 findings per SMC Audit.

FIGURE 14 | Number of SMC Audits Reported by RO

FIGURE 15 | Findings per SMC Audit

Figure 16 displays ROs attended 260 ship management companies to conduct Document of Compliance (DOC) audits on behalf of the Coast Guard and issued 805 findings. Figure 17 displays a rate of 3.1 findings per DOC audit.

FIGURE 16 | Number of DOC Audits Reported by RO

FIGURE 17 | Findings per DOC Audit

When assessing U.S. Flag and RO performance, the Flag State Control Division (CG-CVC-4) also considers the data and information on U.S. flagged ships collected by the Paris and Tokyo Memorandum of Understanding (MOU) Port State Control Regimes. The data from these sources provides additional metrics as to the performance of the U.S. fleet abroad.

The Paris MOU 2021 Annual Report, shows U.S. flag performance remains on the “White List” which represents quality flags with a consistently low detention record.

Excerpt from the Paris MOU 2021 Performance List

REPORT YEAR	FLAG	INSPECTIONS 2019-2021	DETENTIONS 2019-2021
2021	U.S.	169	2
2020	U.S.	194	4
2019	U.S.	225	8

Excerpt from the Paris MOU 2021 Inspections, Detentions, and Deficiencies Table

REPORT YEAR	INSPECTIONS	INSPECTIONS WITH DEFICIENCIES	DEFICIENCIES	DETENTIONS	DETENTION %
2021	46	26	0	0	0.0
2020	39	24	1	1	2.6
2019	84	41	*	1	1.2

*Data not reported.

The Tokyo MOU 2021 Annual Report, shows U.S. flag performance remain on the “White List” which represents flags with a consistently high performance record.

Excerpt from the Tokyo MOU Annual Report 2021, Port State Inspection Data Per Flag Table

REPORT YEAR	FLAG	INSPECTIONS 2019-2021	DETENTIONS 2019-2021
2021	U.S.	91	1
2020	U.S.	130	3

Alternate Compliance (ACP) & Maritime Security (MSP) Programs Description & Performance

The Alternate Compliance Program (ACP) is a voluntary program that promotes flexibility in vessel construction and reduces duplicative inspections and surveys. Vessels enrolled in the ACP must comply with the international conventions, classification society rules, and the U.S. Supplement. There are 429 vessels enrolled in the ACP.

The Maritime Security Program (MSP), established by the Maritime Administration (MARAD), provides a fleet of commercially viable and military useful vessels to meet national defense and other security requirements as well as to maintain a U.S. presence in international commercial shipping. There are 81 vessels certified under MSP. These ships provide on demand strategic sealift capacity to the Department of Defense.

Figure 18 displays the total number of ACP/MSP vessels in comparison to the rest of the U.S. inspected fleet.

FIGURE 18 | Number of Inspected ACP/MSP Vessels

In 2022, the Coast Guard conducted 792 inspections on ACP and MSP vessels. Of these inspections, 364 inspections, involving 250 vessels resulted in the issuance of 1491 deficiencies. In addition to the deficiencies issued by Coast Guard Marine Inspectors, the ROs also document “findings” during their surveys of ACP/MSP vessels. The RO findings are reflected in the performance indicators earlier in this report.

In comparison to the overall flag state fleet totals, the ACP/ MSP fleet accounted for 2.7% of all inspections and 4.9% of all Coast Guard deficiencies. The ACP/MSP fleet received five Flag State detentions, which accounted for 13% of the detentions of U.S. flag vessels in 2022.

Figure 19 displays the top 10 most prevalent deficiencies by sub-system.

FIGURE 19 | Top 10 Most Prevalent Deficiencies

Plan Review, Tonnage and Load Line Technical Work Oversighted by the Marine Safety Center (MSC)

The MSC monitors plan approvals and other completed RO approval and certification work under delegated authorizations in accordance with Marine Safety Center Technical Note (MTN) 04-03 CH-4, Technical Support and Oversight of Authorized Classification Societies. The approval and certification work includes both existing U.S. vessels as well as new construction vessels prior to entry into service. All data presented is for calendar year 2022.

The MSC received notification of technical work performed by five different ROs involving 721 unique vessels, under delegated authorities as displayed in Table 1. Table 2 displays the number of vessels of each type for which the MSC received notification of technical work under any authority. The values in these figures do not represent unique vessels, as ROs frequently perform work under multiple authorities for a single vessel, and a single vessel may be multi-certificated to operate as more than one vessel type.

TABLE 1 | RO Work by Authority. (Number of Vessels)

AUTHORITY	NO. OF VESSELS
ACP Plan Review (NVIC 2-95 series)	333
Tonnage (46 CFR 69)	267
Stability (NVIC 3-97)	163
Load Line (NVIC 10-85)	89
Other Plan Review (i.e. NVIC 10-82 series, NVIC 03-05)	89

TABLE 2 | RO Work by Vessel Type. (Number of Vessels)

VESSEL TYPE	NO. OF VESSELS
Cargo	307
Barge	83
Passenger	14
Fishing	6
Offshore	171
Other	140

ROs are authorized to perform technical work on the Coast Guard's behalf for a variety of vessel systems. Table 3 shows the number of RO notifications of completed work received by MSC by System Category. Work items vary in scope and may actually be a group of related work which may include plans, certificates, calculations, manuals, and similar technical documents.

TABLE 3 | RO Notifications and MSC Oversight by System Category

SYSTEM CATEGORY	REPORTED WORK		MSC OVERSIGHT COMPLETED	
	Notifications	Vessels	Notifications Selected	Findings Identified by MSC
Structures, Stability & Load Line	4,180	518	259	1
Tonnage Measurement	411	285	45	22
Propulsion & Machinery	4,849	269	82	3
Electrical & Automation	4,107	257	93	5
Cargo Operations & Equipment	117	48	6	0
Fire Safety	730	162	46	2
Personnel Safety	1,719	157	40	1
Other Safety	1,990	137	18	1

The MSC used a risk-based process to identify a diverse selection of RO work for oversight. In 2022, the items selected for review were associated with 125 unique vessels. MSC oversight of selected work items may result in no, one, or more findings concerning the item or group of items selected. As a result of these reviews, the MSC identified and addressed 35 findings with the respective ROs in the following system categories: Structures, Stability & Load Line, Tonnage Measurement, Electrical & Automation, Propulsion & Machinery, and Fire Safety.

CHAPTER

2

Barge Description & Performance

Year in Review

In 2022, the barge fleet consisted of 4,977 active vessels, which represented 26% of the overall U.S. inspected domestic fleet. Of this total, 3,055 barges or 61% participate in the Streamlined Inspection Program (SIP).

Barges may be classified under three regulatory categories based on cargo.

46 CFR Part 30 (Subchapter D) Tank Vessels – Flammable and combustible products in bulk. Tank barge inspections are outlined in 46 CFR 31.

46 CFR Part 90 (Subchapter I) Cargo and Miscellaneous Vessels – Non-flammable and combustible products. Freight barge inspections are outlined in 46 CFR 91.

46 CFR Part 151 (Subchapter O) Hazardous Material Cargoes in Bulk – Chemical and Noxious Liquid Substances (NLS) cargoes. Inspections of barges that carry hazardous material in bulk are outlined in 46 CFR 151.04.

In 2022, 3,310 inspections were conducted on barges, during which 1,577 deficiencies were identified at a ratio of 0.32

deficiencies per vessel. The top 10 most frequently identified deficiencies are shown on the following page. In comparison to the overall Flag State fleet totals, barge inspections accounted for 16% of all inspections and 5% of all deficiencies. Barges received 1 Flag State detention, which accounted for 3% of total detentions in 2022.

In 2022, 312 barges or 6% of the fleet were involved in a reportable marine casualty. The top reportable marine casualty events involving the barge fleet were: collision, allision or grounding, material failure/malfunction, and personnel casualty (injury or death). See figure 8, page 6.

FIGURE 20 | Number of Inspected Barges

Barge Description & Performance

Figure 21 associates the number of inspections with the number of deficiencies for each barge service. The “other” category represents barges whose service is unidentified in MISLE. Passenger barges are accounted for in the passenger vessel data.

FIGURE 21 | Inspections & Deficiencies

Figure 22 displays the ratio of deficiencies per vessel for each barge category.

FIGURE 22 | Deficiencies per Vessel (by category)

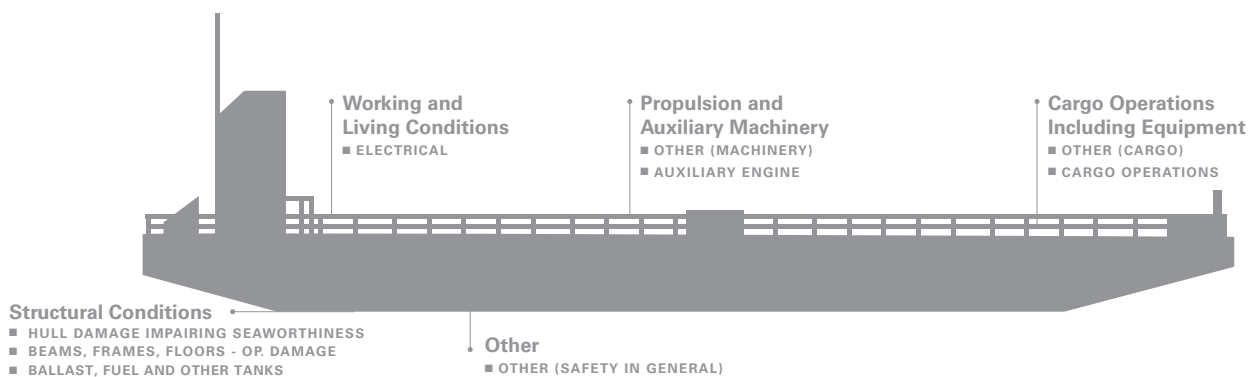

Figure 23 displays the top 10 barge inspection deficiencies.

FIGURE 23 | Top 10 Most Prevalent Deficiencies

Cargo Vessels Description & Performance

Year in Review

In 2022, the cargo vessel fleet consisted of 554 active vessels, which represented 2.89% of the overall fleet size. Of this total, 41% (225) are enrolled in the Alternate Compliance Program (ACP) and 15% (81) are enrolled in the Maritime Security Program (MSP).

Included in the total number of cargo vessels are ships inspected under 46 CFR Subchapters I, D, and O. Subchapter I vessels consisted primarily of industrial vessels carrying freight bulk cargoes, general dry cargo, roll-on roll-off cargo vessels, and miscellaneous vessels such as cutter head dredges and saturation dive vessels. Those inspected under Subchapter D and O are tank vessels. It is important to note that a majority of the cargo vessels are enrolled in alternative inspection programs where a Recognized Organization (RO) conducts statutory services and certification on behalf of the Coast Guard. The data in this section only represents Coast Guard inspections and issued deficiencies.

The Coast Guard conducted 1,151 inspections in 2022, during which 1,965 deficiencies were identified at a ratio of 3.6 deficiencies per vessel. The top 10 most frequently identified deficiencies are shown on the following page.

Cargo vessel inspections accounted for 5.7% of the total inspections and 6.4% of the overall Coast Guard issued deficiencies. Cargo vessels received 6 Flag State detentions, which accounted for 15.4% of total detentions in 2022.

In 2022, 273 cargo ships or 49% of the fleet were involved in a reportable marine casualty. The top three most prevalent types of reportable marine casualty events involving cargo vessels were: material failure/malfunction, personnel casualty (injury or death), and loss/reduction of propulsion/steering. See figure 8, page 6.

Figure 24 displays the total number and percentage of cargo vessels in comparison to the rest of the U.S. inspected fleet.

FIGURE 24 | Number of Inspected Cargo Vessels

Cargo Vessels Description & Performance

Figure 25 associates the number of inspections with the number of deficiencies for each cargo vessel type. The “other” category represents public vessels and cargo vessels whose service is unidentified in MISLE.

FIGURE 25 | Inspections & Deficiencies

FIGURE 26 | Deficiencies per Vessel (by category)

Figure 27 displays the top 10 cargo vessel inspection deficiencies.

FIGURE 27 | Top 10 Most Prevalent Deficiencies

Passenger Vessels Description & Performance

Year in Review

In 2022, the inspected passenger vessel fleet consisted of 6,686 active vessels, which represented 34.8% of the overall fleet. Currently, 24 passenger vessels participate in the Streamlined Inspection Program (SIP).

Included in the total number of passenger vessels are those inspected in accordance with 46 CFR Subchapter T (small passenger vessels under 100 gross tons), H (passenger vessels), and K (small passenger vessels carrying more than 150 passengers or with overnight accommodations for more than 49 passengers). Passenger barges are included in this section.

There were 11,301 passenger vessel inspections conducted in 2022, during which 19,498 deficiencies were identified at a ratio of 2.9 deficiencies per vessel. The top 10 most frequently identified deficiencies are shown on the following page. In comparison to the overall Flag State fleet totals, passenger vessel inspections accounted for 55.6% of the inspections and 65.85% of the deficiencies. Passenger vessels received 17 Flag State detentions, which accounted for 43.6% of total detentions in 2022.

In 2022, 560 inspected passenger vessels or 8.4 % of the fleet were involved in a reportable marine casualty. The top three reportable marine casualty events involving the inspected passenger vessel fleet were: material failure/malfunction, personnel casualty (injury or death), and collision, allision, or grounding. *See figure 8, page 6.*

Figure 28 displays the total number and percentage of passenger vessels in comparison to the rest of the U.S. inspected fleet.

FIGURE 30 | Deficiencies per Vessel (by category)

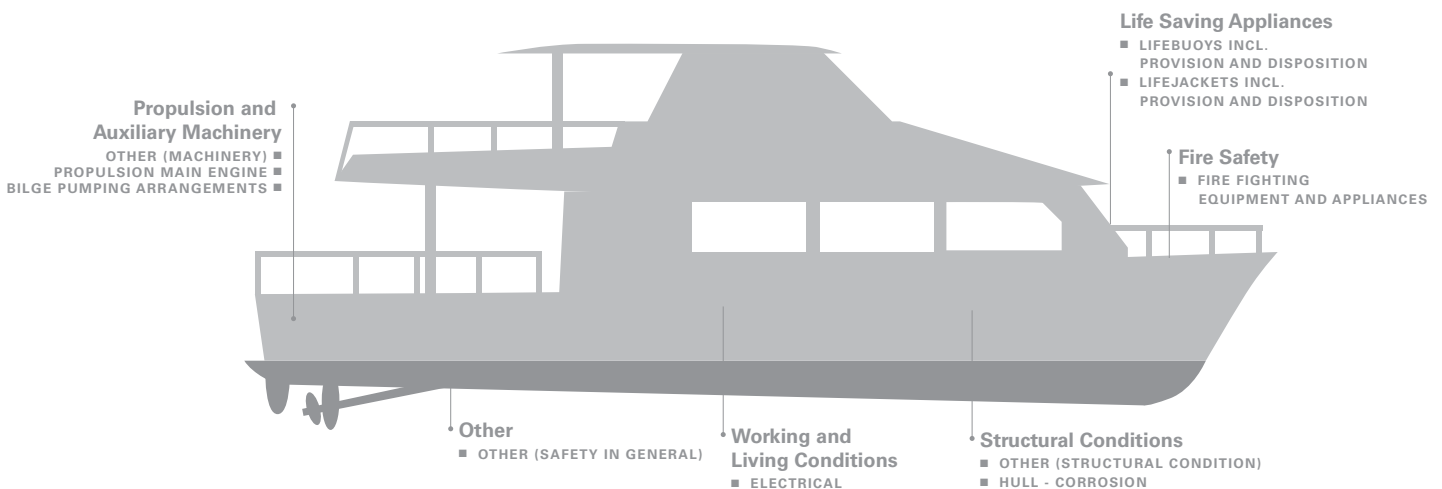

Figure 31 displays the top 10 passenger vessel inspection deficiencies.

FIGURE 31 | Top 10 Most Prevalent Deficiencies

Outer Continental Shelf Vessels Description & Performance

Year in Review

In 2022, the Outer Continental Shelf (OCS) fleet consisted of 498 active vessels, which represented 3% of the overall fleet size. Of this total, 35% (176) are Offshore Supply Vessels (OSV), enrolled in the Alternate Compliance Program (ACP).

Included in the total number of OCS vessels are vessels inspected under 46 CFR Subchapter L (Offshore Supply Vessels) and Floating Production Systems (FPS). Similar to cargo vessels, vessels in this category have certain statutory services completed by an RO. For this report, only Coast Guard inspections data is presented.

There were 682 OCS inspections conducted in 2022, during which 1,205 deficiencies were identified at a ratio of 2.42 deficiencies per vessel. The top 10 most frequently identified deficiencies are shown on the following page. In comparison to the overall Flag State fleet totals, OCS inspections accounted for 3.4% of inspections and 3.9% of deficiencies. OCS vessels received 2 Flag State detentions, which accounted for 5.1% of total detentions in 2022.

In 2022, 30 OCS vessels or 6% of the fleet were involved in a reportable marine casualty. The top three reportable marine casualty events involving the OCS fleet were: loss/reduction of vessel propulsion/steering, material failure/malfunction, collision, allision, or grounding, and discharge/release-pollution. See figure 8, page 6.

Figure 32 displays the total number and percentage of OCS vessels in comparison to the rest of the U.S. inspected fleet.

FIGURE 35 | Top 10 Most Prevalent Deficiencies

Research Vessels and School Ships Description and Performance

Year in Review

In 2022, this fleet consisted of 55 active vessels, which represented 0.3% of the overall fleet size. Included in the total number of vessels are those inspected under 46 CFR Subchapters U (research vessels) and R (school ships).

There were 123 inspections conducted in 2022, during which 223 deficiencies were identified at a ratio of 4.05 deficiencies per vessel. The top 10 most frequently identified deficiencies are listed in order on the following page. In comparison to the overall Flag State fleet totals, Research and School Ship inspections accounted for 0.6% of inspections and 0.7% of deficiencies. Research vessels and School Ships received one Flag State detention in 2022.

In 2022, 13 Research Vessels/ School Ships or 24% of the fleet were involved in a reportable marine casualty. The top reportable marine casualty events involving this fleet were:

collision, allision, or grounding, material failure/malfunction, and personnel casualty (injury or death). See figure 8, page 6.

Figure 36 displays the total number and percentage of Research vessels and School Ships in comparison to the rest of the U.S. inspected fleet.

Towing Vessel Description and Performance

Year in Review

In 2022, this fleet consisted of 6,419 active vessels, which represented 33% of the overall fleet size. Included in the total number of vessels are those towing vessels falling under inspection Subchapters I, M, and C. The domestic annual report will collect and report data for all towing vessels, both inspected and uninspected, until completion of the regulatory phase-in for Subchapter M.

There were 3,774 inspections conducted in 2022, during which 6,165 deficiencies were identified at a ratio of .96 deficiencies per vessel. The top 10 most frequently identified deficiencies are shown on the following page. In comparison to the overall Flag State fleet totals, towing vessel inspections accounted for 18.55% of inspections and 20.13% of deficiencies. Towing vessels received 12 Flag State detentions in 2022, accounting for 31% of all Flag State detentions.

In 2022, 1,178 towing vessels or 18% of the fleet were

involved in a reportable marine casualty. The top three reportable marine casualty events involving the towing vessel fleet were: collision, allision, or grounding, material failure/malfunction, and loss/reduction of propulsion/steering. See figure 8, page 6.

Figure 40 displays the total number and percentage of towing vessels in comparison to the rest of the U.S. inspected fleet.

Fishing Vessel Description and Performance

The Coast Guard estimates that there are over 35,000 commercial fishing vessels in domestic service. As the Coast Guard only maintains records for fishing vessels which are enrolled in the decal examination program, these numbers are based on a combination of state and federal sources. Included in the Commercial Fishing Vessel population are Fishing Vessels, Fish Processing Vessels, and Fish Tender Vessels.

	Initial CFVS Exam	Total Dockside Exams*	CFVS Decals Issued	Exam Deficiencies Issued
Fish Catching Vessel	803	4,161	3,989	6,639
Fish Processing Vessel	0	39	28	15
Fishing Tender	7	51	42	106
Totals	810	4,251	4,059	6,760

*Note: Total dockside exams reflect initial, fix-it, and follow-up examinations.

Commercial Fishing Vessel Safety (CFVS) National Communications Plan

In 2022 the Coast Guard continued Commercial Fishing Vessel Safety (CFVS) National Communications Plan measures. This plan promotes a variety of outreach mechanisms for information distribution between the U.S. Coast Guard and the fishing industry. Targeted outreach focuses on specific fisheries, vessel types, and geographical areas of operation. The goal of each CFVS outreach effort is to distribute applicable Coast Guard issued alerts, bulletins, or other related CFV policies. Additionally, the CFVS National Communications Plan promotes two-way communications, in efforts to develop mutual and professional relationships with a common goal of prevention and safety.

FIGURE 46 | CFVS Outreach Efforts

FIGURE 47 | Industry Interactions

FIGURE 48 | CFVS Related Documents

FIGURE 49 | CFVS Target Audience

Various outreach efforts, such as dock walking, newsletters, social media, and official correspondence maximized contact within the maritime community. During 2022, USCG staff members recorded over 615,000 interactions with the commercial fishing industry.

Definitions

Barges: Non-self-propelled vessels inspected under 46 Code of Federal Regulations (CFR) Subchapters D (Tank Barges), I (Freight/Industrial Barges), and O (Certain Bulk Dangerous Cargo Barges).

Cargo Vessels: Vessels inspected under Subchapter I (Freight/Industrial), Subchapter D (Tank), and Subchapter O (Certain Bulk Dangerous Cargo) and public vessels that are not covered by any other category.

Passenger Vessels: Vessels carrying passengers in accordance with 46 CFR Subchapter T (passenger vessels under 100 gross tons), H (passenger vessels greater than 100 gross tons), or K (passenger vessels under 100 gross tons carrying more than 150 passengers or with overnight accommodations for more than 49 passengers). For the purpose of this report, passenger barges are also included in the passenger vessel statistics.

Outer Continental Shelf (OCS): Offshore Supply Vessels (OSV) inspected under 46 CFR Subchapter L and Floating Production Systems (FPS).

Research Vessels and School Ships: Research vessels inspected under 46 CFR Subchapter U and School ships inspected under 46 CFR Subchapter R.

Towing Vessels: Vessels whose primary service is towing and are inspected under 46 CFR Subchapters M and I or uninspected under Subchapter C.

Fishing Vessels: Vessels examined under 46 CFR Part 28 that are commercial fishing, fishing processing, or fish tender vessels. A Fishing Vessel is defined under 46 USC Subchapter 2101 (11a) as a vessel that commercially engages in the catching, taking, or harvesting of fish or an activity that can reasonably be expected to result in the catching taking or harvesting of fish. Fish Processing Vessels are defined under 46 USC Subchapter 2101 (11b) as a vessel that commercially prepares fish or fish products other than by gutting, decapitating, gilling, skinning, shucking, icing, freezing, or brine chilling. Fish Tender Vessels are defined under 46 USC Subchapter 2101 (11c) as a vessel that commercially supplies, stores, refrigerates, or transports fish, fish products, or materials directly related to fishing or

the preparation of fish to or from a fishing, fish processing, or fish tender vessel or a fish processing facility.

Inspection: All vessel inspection activities recorded in MISLE which require physical attendance onboard by a Marine Inspector. For example, a Certificate of Inspection (COI) activity may include multiple sub-activities, but would be counted as one inspection in this report. For consistency, administrative activities that do not require a vessel visit are excluded from this report.

Reportable Marine Casualty: Any marine casualty consisting of a grounding, allision, or collision; loss of main propulsion; occurrence materially and adversely affecting the vessel's seaworthiness; a loss of life; an injury to a person which requires professional medical treatment; damage to property in excess of \$75,000; or a discharge or release of a reportable quantity of a hazardous substance into the navigable waters. 46 CFR Subpart 4.05-1.

Streamlined Inspection Program (SIP): A voluntary alternative inspection program, outlined in 46 CFR Part 8, for U.S. documented or registered vessels required to maintain a valid certificate of inspection (COI). Navigation and Vessel Inspection Circular (NVIC) 2-99 offers further SIP guidance. Instead of the traditional Coast Guard inspection by a Marine Inspector, the SIP allows onboard and shore side vessel operating personnel to conduct the majority of inspections required by the CFRs, and to have the adequacy of these inspections verified by Coast Guard Marine Inspectors on a regular basis.

Recognized Organization (RO): An organization that has been assessed by a Flag State, and found to comply with the RO Code. The RO Code applies to all organizations being considered for recognition or that are recognized by a Flag State to perform, on its behalf, statutory certification and services under mandatory IMO instruments and national legislation.

Third-party Organization (TPO): An organization approved by the Coast Guard to conduct independent verifications to assess whether towing vessels or their Towing Safety Management Systems comply with applicable requirements contained in 46 CFR Subchapter M.
