Compania Naviera Hocaille S.A.

Deficiencies: Code - Category

**15109 - Maintenance of the ship and
equipment**

**04114 - Emergency source of power -
Emergency generato**

Description

The company should establish procedures to ensure that the ship is maintained in conformity with the provisions of the rules and regulations. The technical and operational nature of deficiency numbers 2 and 3 below provides objective evidence of a serious failure of the implementation of the ISM Code. An external audit report satisfactory to the OCMI must be submitted prior to clearance of this deficiency.

Each emergency generating set arranged to be automatically started shall be equipped with starting devices approved by the Administration. During testing of emergency generator, one of the batteries exploded due to unknown causes. A review of the PMS system showed EDG battery testing overdue and no monthly emergency power supply testing records were available.
