DRUG & ALCOHOL PROGRAM CHECKLIST

<u>Inspection Item</u>	<u>Applicable Regs.</u>	<u>Yes</u>	<u>No</u>
Do crew members know who the Designated Employee Representative (DER) is?	49 CFR 40.3	<input type="checkbox"/>	<input type="checkbox"/>
Is there a copy of the company's policy or policy statement aboard?	46 CFR 16.401	<input type="checkbox"/>	<input type="checkbox"/>
Are crew members aware of where to obtain Employee Assistance information?	46 CFR 16.401	<input type="checkbox"/>	<input type="checkbox"/>
Has supervisory and general crew member drug awareness training been conducted?	46 CFR 16.401	<input type="checkbox"/>	<input type="checkbox"/>
Are Hotline Numbers posted in a common space?	46 CFR 16.401	<input type="checkbox"/>	<input type="checkbox"/>
Knowledge of where to go or how to get drug and alcohol testing accomplished in the event of a Serious Marine Incident (2hr testing for alcohol; 32 hr testing for drugs)	46 CFR 4.06	<input type="checkbox"/>	<input type="checkbox"/>
Are Alcohol Testing Devices kept onboard?	46 CFR 16.240 46 CFR 4.06	<input type="checkbox"/>	<input type="checkbox"/>
Were crew members pre-employment tested?	46 CFR 16.210	<input type="checkbox"/>	<input type="checkbox"/>
Have crew members been randomly tested this year?	46 CFR 16.230	<input type="checkbox"/>	<input type="checkbox"/>

This document does not establish or change Federal laws or regulations. References given are only general guides. Refer to IMO publications, CFR's, NVIC's or any locally produced cite guides for specific regulatory references. Not all items in this book are applicable to all vessels. Due to recent regulatory revisions, OLD SUBCHAPTER T cites (applicable to existing vessels on or before March 10, 1996) are provided in addition to new Subchapter T cites. Example (**46 CFR 184.10-1**)

NOTE: *Guidance on how to conduct inspections on U.S. flagged SPV can be found in Marine Safety Manual (MSM) Volume II, Chapter B1: Inspection of Vessels for Certification. All MSM cites listed in this book refer to MSM Volume II, unless otherwise indicated.*

Recommended US Vessel Deficiency Procedures:

Step	Action								
1	Identify deficiency.								
2	Inform vessel representative.								
3	Record on the <i>Deficiency Summary Worksheet</i> (next page).								
4	If deficiency is corrected prior to end of inspection, go to Step 7.								
5	<p>If deficiency is unable to be corrected prior to end of inspection, issue CG-835 in accordance with table below.</p> <table border="1"> <thead> <tr> <th>IF deficiency:</th> <th>THEN issue CG-835:</th> </tr> </thead> <tbody> <tr> <td> <p>Does NOT immediately impact crew/passenger safety, security, hull seaworthiness, or the environment, e.g.,</p> <ul style="list-style-type: none"> • Missing placards • Non-metallic expansion joints more than 10 years in service </td> <td> <p>That provides a specific time for correcting deficiency, e.g.,</p> <ul style="list-style-type: none"> • "X" number of days • At next drydock </td> </tr> <tr> <td> <p>Allows vessel operations to be MODIFIED to meet less stringent requirements, e.g.,</p> <ul style="list-style-type: none"> • Expired international certificates • Automation defect • Insufficient lifesaving equipment </td> <td> <p>That restricts operation of vessel to meet current vessel conditions, e.g.,</p> <ul style="list-style-type: none"> • Reduced route • Increased crew • Fewer passengers </td> </tr> <tr> <td> <p>DOES immediately impact crew/passenger safety, security, hull seaworthiness, or the environment, and cannot be modified to meet less stringent requirements, e.g.,</p> <ul style="list-style-type: none"> • Missing or defective firefighting equipment • Structural defect or damage </td> <td> <p>That requires the deficiency to be corrected prior to operating vessel ("NO SAIL" item), e.g.,</p> <ul style="list-style-type: none"> • Prior to carrying passengers • Prior to carrying cargo </td> </tr> </tbody> </table>	IF deficiency:	THEN issue CG-835:	<p>Does NOT immediately impact crew/passenger safety, security, hull seaworthiness, or the environment, e.g.,</p> <ul style="list-style-type: none"> • Missing placards • Non-metallic expansion joints more than 10 years in service 	<p>That provides a specific time for correcting deficiency, e.g.,</p> <ul style="list-style-type: none"> • "X" number of days • At next drydock 	<p>Allows vessel operations to be MODIFIED to meet less stringent requirements, e.g.,</p> <ul style="list-style-type: none"> • Expired international certificates • Automation defect • Insufficient lifesaving equipment 	<p>That restricts operation of vessel to meet current vessel conditions, e.g.,</p> <ul style="list-style-type: none"> • Reduced route • Increased crew • Fewer passengers 	<p>DOES immediately impact crew/passenger safety, security, hull seaworthiness, or the environment, and cannot be modified to meet less stringent requirements, e.g.,</p> <ul style="list-style-type: none"> • Missing or defective firefighting equipment • Structural defect or damage 	<p>That requires the deficiency to be corrected prior to operating vessel ("NO SAIL" item), e.g.,</p> <ul style="list-style-type: none"> • Prior to carrying passengers • Prior to carrying cargo
IF deficiency:	THEN issue CG-835:								
<p>Does NOT immediately impact crew/passenger safety, security, hull seaworthiness, or the environment, e.g.,</p> <ul style="list-style-type: none"> • Missing placards • Non-metallic expansion joints more than 10 years in service 	<p>That provides a specific time for correcting deficiency, e.g.,</p> <ul style="list-style-type: none"> • "X" number of days • At next drydock 								
<p>Allows vessel operations to be MODIFIED to meet less stringent requirements, e.g.,</p> <ul style="list-style-type: none"> • Expired international certificates • Automation defect • Insufficient lifesaving equipment 	<p>That restricts operation of vessel to meet current vessel conditions, e.g.,</p> <ul style="list-style-type: none"> • Reduced route • Increased crew • Fewer passengers 								
<p>DOES immediately impact crew/passenger safety, security, hull seaworthiness, or the environment, and cannot be modified to meet less stringent requirements, e.g.,</p> <ul style="list-style-type: none"> • Missing or defective firefighting equipment • Structural defect or damage 	<p>That requires the deficiency to be corrected prior to operating vessel ("NO SAIL" item), e.g.,</p> <ul style="list-style-type: none"> • Prior to carrying passengers • Prior to carrying cargo 								
6	Enter CG-835 data in MISLE.								

Task 19 Post-Inspection Items

Step	Action	Ref
19.1	<input type="checkbox"/> Issue letters.	
19.2	<input type="checkbox"/> Complete MISLE entries.	
19.3	<input type="checkbox"/> Initiate report of violation (if necessary).	

Notes:

	<input type="checkbox"/> Ensure enclosed spaces containing machinery powered by gasoline are equipped with a flammable vapor detection system.	
	<input type="checkbox"/> Ensure flammable vapor detection system meets UL Standard 1110 "Marine Combustible Gas Indicators"	46 CFR 182.480 (c)
	<input type="checkbox"/> Ensure system is operational for at least 30 seconds prior to engine startup and continues sensing the entire engine is running	46 CFR 182.480 (d)
	<input type="checkbox"/> Ensure system provides a visual and audible alarm at the operating station	46 CFR 182.480 (e)
	<input type="checkbox"/> Ensure a system sensor is located in the lowest part of a machinery space and a fuel tank space above expected bilge water levels	46 CFR 182.480 (b)&(h)
	<input type="checkbox"/> Ensure that system operating instructions are posted at the operating station and that the system's operations and maintenance manual is onboard	46 CFR 182.415 (a)
	<input type="checkbox"/> Ensure all carburetors (except downdraft types) are equipped with an integral or externally fitted drip collector of adequate capacity.	

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.29	<input type="checkbox"/> Ensure a loop of copper tubing or flexible hose is installed in the fuel supply line where it connects to the engine.	46 CFR 182.455 (b)(5)
10.30	<input type="checkbox"/> Ensure that a suitable metal marine type strainer is fitted in the fuel supply line in the engine compartment and meets the following: <input type="checkbox"/> Is leak free; and <input type="checkbox"/> Fuel filters fitted with bowls of other than steel construction (such as Raycor filter with clear bowls) must be approved by COMDT, be protected from mechanical damage, and be fitted with a flame shield if specified when approved by COMDT.	46 CFR 182.455 (b)(6) 46 CFR 182.20-40(b)(5) 46 CFR 182.15-40(b)(5)
10.31	<input type="checkbox"/> Ensure any accessory installed in the fuel line is independently supported.	46 CFR 182.455 (b)(7)
10.32	<input type="checkbox"/> Ensure any valves for removing water or impurities from diesel fuel water traps or strainers are fitted with caps or plugs.	46 CFR 182.455 (b)(9)
10.33	<input type="checkbox"/> Ensure portable fuel tanks are not used except when used for portable dewatering pumps and outboard engines.	46 CFR 182.458 (a)
10.34	<input type="checkbox"/> Ensure portable fuel tanks and any related fuel lines and accessories meet ABYC H-25 standards.	46 CFR 182.458 (b)

Notes:

Task 9: Fire Protection Systems (Continued)

Step	Action	Ref
9.13	<input type="checkbox"/> Test pump (all vessels)	46 CFR 181.300
	<input type="checkbox"/> Vessel < 65ft & > 49 passengers & vessels > 65ft <input type="checkbox"/> No excessive leaking <input type="checkbox"/> Manual priming not required <input type="checkbox"/> Pump is operable from main operating station and locally at the pump. <input type="checkbox"/> Meets required capacity 50 gpm and pressure of 60psi <input type="checkbox"/> Pump must have a pressure gauge	
9.13	<input type="checkbox"/> Inspect fire hoses and nozzles. <input type="checkbox"/> Vessel < 65ft & > 49 passengers & vessels > 65ft <input type="checkbox"/> Commercial lined fire hose (UL 19) <input type="checkbox"/> 1.5 inches in diameter & 50 ft in length <input type="checkbox"/> Fittings of brass or other suitable material (NFPA) <input type="checkbox"/> Nozzle must be approved under 46 CFR 162.027 or type recognized by Commandant. <input type="checkbox"/> Vessel < 65ft & < 49 passengers <input type="checkbox"/> May have a garden type hose > .0625 inches in diameter and >25 ft but < 50 ft <input type="checkbox"/> Fittings must be corrosion resistant material <input type="checkbox"/> Nozzle must be corrosion resistant and be able to switch from stream to spray.	46 CFR 181.320

Notes:

Task 9: Fire Protection Systems (Continued)

Step	Action	Ref
9.14	<input type="checkbox"/> Test fire hoses using installed fire pump. <input type="checkbox"/> Piping <input type="checkbox"/> Valves <input type="checkbox"/> Fittings	46 CFR 176.810 46 CFR 181.310 46 CFR 181.320
9.15	<input type="checkbox"/> Inspect structural fire protection. <input type="checkbox"/> Noncombustible trim <input type="checkbox"/> Fire-resistant furnishing	46 CFR 177.405 46 CFR 177.410
9.16	<input type="checkbox"/> Inspect paint lockers. <input type="checkbox"/> Constructed of steel or equivalent material <input type="checkbox"/> Protected by fire extinguishing system	46 CFR 177.405
9.17	<input type="checkbox"/> Inspect emergency outfits and equipment (SOLAS only). <input type="checkbox"/> Vessel provided with required number of outfits <input type="checkbox"/> Spare charges for breathing apparatus are provided <input type="checkbox"/> Storage locations are easily accessible, permanently and clearly marked, and separated as wide as practicable.	SOLAS II-2/10

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.26	<input type="checkbox"/> Ensure no cock-type valves are in fuel lines except for the solid bottom type.	46 CFR 182.455 (b)(3) 46 CFR 182.15-40(a)(5) 46 CFR 182.20-40(a)(4)
10.27	<input type="checkbox"/> Ensure all fuel lines are accessible for inspection, protected from mechanical injury, and secured against excessive movement and vibration. <input type="checkbox"/> Ensure fuel line securing straps are of soft, nonferrous metal which have no sharp edges and are insulated to protect against corrosion <input type="checkbox"/> Ensure fuel lines passing through bulkheads are protected from damage by close fitting ferrules or stuffing boxes	46 CFR 182.455 (b)(3)
10.28	<input type="checkbox"/> Ensure manually operated shutoff valves are installed in the fuel supply lines at the fuel tank connection and the engine end of the fuel line. <input type="checkbox"/> Ensure that the shutoff valve at the fuel tank connection (also known as the emergency fuel shutoff valve) can be manually operated from outside the compartment in which the valve is located. <input type="checkbox"/> If the handle of the emergency fuel shutoff valve is located inside the machinery space, it must be located so operator does not have to reach more than 12 inches into space and must be shielded from flames. <input type="checkbox"/> Ensure electric solenoid shutoff valves are used only if used in addition to the manual valves. <input type="checkbox"/> Ensure remote fuel shutoff stations are marked indicating direction of turn	46 CFR 182.455 (b)(4) 46 CFR 182.15-40(b)(3) 46 CFR 182.20-40(b)(3) 46 CFR 185.608 46 CFR 185.30-20

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.25	Inspect fuel piping as follows:	
	<input type="checkbox"/> Ensure fuel lines are of one of the following materials:	46 CFR 182.455 (a)(1)
	<input type="checkbox"/> Annealed tubing of copper, copper-nickel, or nickel-copper having wall thickness of at least 0.035 inches; or	
	<input type="checkbox"/> For diesel fuels, piping which provides equivalent safety such as seamless steel pipe or tubing may be used; or	46 CFR 182.455 (a)(1)(iii)
	<input type="checkbox"/> For diesels fuels on aluminum hulled vessels, aluminum piping of at least schedule 80 may be used.	
	<input type="checkbox"/> Flexible hose meets the following requirements:	46 CFR 182.720 (e)
	<input type="checkbox"/> Hose meets SAE J-1942 standards and has end fittings that comply with SAE J-1475 standards which have been installed IAW the manufacturer's instructions.	46 CFR 182.40 46 CFR 182.720 (e)(1)
	<input type="checkbox"/> Hose runs are visible, easily accessible, protected from mechanical damage, and do not penetrate watertight decks or bulkheads	46 CFR 182.720 (e)(3)
	<input type="checkbox"/> Hose used only for the purpose of flexibility in lengths ≤ 30 inches and subject to pressures ≤ 5 psig (normally used to connect metallic fuel pipe runs to the engine to eliminate effects of engine vibration) may meet the following requirements:	46 CFR 182.720 (e)(3)(v)
	<input type="checkbox"/> Suitable compression-type connection fittings may be used or hose may be installed with two hose clamps at each end of the hose; and	
	<input type="checkbox"/> USCG Type A1, A2, B1, or B2 may be accepted instead of hose meeting SAE Standard J-1942	

Notes:

Task 9: Fire Protection Systems (Continued)

Step	Action	Ref
9.18	<input type="checkbox"/> Verify fire control plan (SOLAS only).	SOLAS II-2/15/3
	<input type="checkbox"/> Vessels on an international route must have general arrangement plans permanently exhibited with details of decks, divisions, fire fighting equipment	
	<input type="checkbox"/> Fire control plan must be in language required by administration and translated into English or French.	
	<input type="checkbox"/> Duplicate set of plans shall be provided in a prominent weather tight container outside deckhouse for aid of shore side firefighting personnel.	

Notes:

Task 10: Machinery and Auxiliary Machinery

Step	Action	Ref
10.1	Inspect propulsion machinery.	
	<input type="checkbox"/> Ensure propulsion machinery is suitable and capable of operating at constant marine loads	46 CFR 182.200 (a)
	<input type="checkbox"/> Ensure propulsion machinery has not been changed out since last inspection (change in center of gravity and weight may adversely affect stability).	46 CFR 176.702 46 CFR 176.402 (d)(3) & (4)
	<input type="checkbox"/> Ensure all engines have at least two means for stopping the engine(s), one of which may be the shutoff valves required in fuel lines.	46 CFR 182.200 (b)
	<input type="checkbox"/> Ensure there is a reliable means of shutting down a propulsion engine at the main pilothouse control station.	46 CFR 184.620 (a) 46 CFR 175.10-29
	<input type="checkbox"/> Ensure machinery guards are installed over exposed gears, belts or other rotating machinery	46 CFR 184.620 (b) 46 CFR 177.960 46 CFR 177.35-15
10.2	<input type="checkbox"/> Inspect internal combustion engines (diesel and gasoline powered).	
	<input type="checkbox"/> Ensure all starting motors, generators, and spark-producing devices are mounted as high above bilges as practicable	46 CFR 182.410 (a)
	<input type="checkbox"/> Ensure gauges for rpm, jacket water discharge temperature, and lubricating oil pressure are provided and are readily visible at the operating station (rpm gauge not required for existing vessels)	46 CFR 182.410 (b) 46 CFR 182.15-5 46 CFR 182.20-5
	<input type="checkbox"/> Ensure all flexible hoses are clamped at each end with two corrosion-resistant metal hose clamps where practicable (a single clamp is allowed when pipe end is expanded or beaded) <ul style="list-style-type: none"> <input type="checkbox"/> Hose meets SAE J-1942 standards and has end fittings that comply with SAE J-1475 standards which have been installed IAW the manufacturer's instructions. 	46 CFR 182.410 (d) 46 CFR 182.720

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.22	<input type="checkbox"/> Ensure discharge ends of vent pipes terminate outside of vessel, either on the hull exterior or in U-bends as high above the weather deck as possible. <ul style="list-style-type: none"> <input type="checkbox"/> Ensure discharge ends of vent pipes are fitted with a flame screen or flame arrester of such design and size as to not reduce the net cross sectional diameter of the vent pipe and to permit cleaning or renewal (flame screens must consist of a single screen of corrosion resistant wire of at least 30 x 30 mesh). 	46 CFR 182.450 (e)
10.23	<input type="checkbox"/> Verify when flexible hose is used in the vent pipe: <ul style="list-style-type: none"> <input type="checkbox"/> Hose has high resistance to salt water, petroleum oils, heat, and vibration. <input type="checkbox"/> Hose overlaps metal pipe ends at least 1-½ times the pipe diameter and is secured with 2 hose clamps. 	46 CFR 182.450 (g)
10.24	<input type="checkbox"/> Vent pipes are installed with an upward gradient in a manner to prevent fuel from being trapped in the line.	46 CFR 182.450 (h)

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.17	<input type="checkbox"/> Ensure all fuel tanks are electrically bonded to a common ground.	46 CFR 182.440 (b)(4) 46 CFR 182.15-25(b)(4)
10.18	<input type="checkbox"/> Ensure there is a means to accurately determine the amount of fuel in each tank.	46 CFR 182.445 (b)
10.19	<input type="checkbox"/> Ensure fill pipes and sounding pipes are so arranged that overflow of liquid or vapor cannot escape to the inside of the vessel.	46 CFR 182.445 (d)
10.20	<input type="checkbox"/> Ensure all fuel tank fill pipes and sounding pipes are suitably marked.	46 CFR 182.445 (e)
10.21	<input type="checkbox"/> Each fuel tank is fitted with a vent pipe connected to its highest point (tanks without a vent line must be inspected as a pressure vessel). <input type="checkbox"/> Ensure net cross sectional area of vent pipes are at least: <input type="checkbox"/> .625 inches if fill pipe terminates at top of the tank; <input type="checkbox"/> .75 inches if fill pipe extends into tank; or <input type="checkbox"/> The cross sectional area of the fill pipe if the tank is filled under pressure. <input type="checkbox"/> Ensure tank space is properly vented <input type="checkbox"/> >500 cubic feet = gooseneck >2.5 inches <input type="checkbox"/> <500 cubic fee = gooseneck >1.5 inches	46 CFR 182.440 (c)(3) 46 CFR 182.450 (b)&(c) 46 CFR 182.450 (d) 46 CFR 182.450 (e) 46 CFR 182.15-35 46 CFR 182.460 46 CFR 182.470 46 CFR 182.15-45 46 CFR 182.20-50

Notes:

Step	Action	Ref
10.3	<input type="checkbox"/> Inspect engine cooling system as follows: <input type="checkbox"/> Ensure the engine head, block, and exhaust manifold are cooled by water from a pump that operates whenever the engine operates. <input type="checkbox"/> Ensure a suitable strainer is installed on the raw water intake line of the cooling system. <input type="checkbox"/> On vessels ≤ 65 ft and carrying ≤ 12 passengers, a propulsion or auxiliary gasoline engine may be air cooled if in compliance with ABYC P-4. <input type="checkbox"/> An auxiliary gasoline engine may be air cooled if it is installed on an open deck and has a self-contained fuel system. <input type="checkbox"/> A diesel engine may be air cooled or employ an air cooled jacket water radiator when sufficient ventilation is available, or is installed on vessels ≤ 65 ft and carrying ≤ 12 passengers and is in compliance with ABYC P-4.	46 CFR 182.420 (a)(1) 46 CFR 182.420 (a)(2) 46 CFR 182.420 (c)&(d) 46 CFR 182.420 (d)(1) 46 CFR 182.420 (e) 46 CFR 182.465 (b)
10.4	<input type="checkbox"/> Ensure keel coolers are provided with a shutoff valve where the cooler penetrates the hull (not required for integral keel coolers). <input type="checkbox"/> Ensure all piping outboard of the shutoff valves is at least Schedule 80 and that any flexible hoses used at the machinery connections is approved hose and double hose clamped <input type="checkbox"/> Ensure all integral keel coolers are fabricated with material of the same thickness and quality of the hull using full penetration welds and with a slope at each end not greater than 4 to 1.	46 CFR 182.422 (b) 46 CFR 182.422 (c)&(d) 46 CFR 182.422 (e)

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.5	<input type="checkbox"/> Inspect engine exhaust systems as follows (as an alternative, vessels may instead comply with ABYC P-1): <ul style="list-style-type: none"> <input type="checkbox"/> Ensure dry exhaust pipes are clear of and suitably insulated from combustible materials and suitably insulated to prevent injuries. <input type="checkbox"/> Ensure dry exhaust pipes installed on wood and FRP boats are installed IAW ABYC P-1 (designed to arrest sparks; metallic connections are flanged, threaded, or welded; and flexible sections are seamless stainless steel). 	46 CFR 182.425 (c) 46 CFR 182.430 (k) 46 CFR 182.425 (a)(1) & (2)(v) 46 CFR 177.405 (b)
10.6	<input type="checkbox"/> Ensure horizontal dry exhaust pipes: <ul style="list-style-type: none"> <input type="checkbox"/> Do not pass through living or berthing spaces. <input type="checkbox"/> Terminate above the deepest load waterline. <input type="checkbox"/> Are arranged to prevent entry of cold water from rough or boarding seas (i.e., flaps installed over exhaust outlet). <input type="checkbox"/> Are constructed of corrosion-resisting material at the hull penetration. 	46 CFR 182.425 (a)(2)

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.16	<input type="checkbox"/> Ensure independent fuel tank(s) has not been replaced with a different sized tank or relocated since last inspection (change in center of gravity and weight may adversely affect stability). <ul style="list-style-type: none"> <input type="checkbox"/> Ensure fuel tank(s) is free of excessive corrosion, that no fittings are leaking, that independent fuel tanks are properly secured in place to prevent movement, and that tank is insulated from braces and supports by a nonabrasive and nonabsorbent material. <input type="checkbox"/> When the structural integrity of a fuel tank is in question, ensure the tank is replaced or, as an alternative, witness a satisfactory hydrostatic (use liquid only, not air) pressure test of the tank to 5 psig or 1-½ times the max pressure head the tank may be subjected to, whichever is greater. 	46 CFR 176.702 46 CFR 176.402 (d)(3) & (4) 46 CFR 176.804 (d) 46 CFR 182.440 (b)(3) 46 CFR 176.804 (c)(1)

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.15	<input type="checkbox"/> Conduct tests & inspections of UNFIRED pressure vessels IAW 46 CFR 61.10.	46 CFR 176.812
	<input type="checkbox"/> Complete external and internal visual inspection at least every 5 years, except:	46 CFR 182.15-25(b)(4)
	<input type="checkbox"/> Internal inspection is not required on Class I and II pressure vessels (see 46 CFR table 54.01-5(b)) with a volume of <5 cu ft which do not contain hazardous materials and are stamped with either the ASME "U" or "UM" symbols	46 CFR 61.10-5 (b)
	<input type="checkbox"/> Complete hydrostatic test (water, not air) if visual inspection reveals defect which may effect safety of pressure vessel. Test pressure shall be 1-1/2 times the vessel's MAWP	46 CFR 54.01-5 (c)(3)
	<input type="checkbox"/> Complete check of safety or relief valves settings at least twice in 5 years and not more than every 3 years	46 CFR 61.10-5 (b) (3)
	<input type="checkbox"/> Ensure safety or relief valve setting does not exceed the pressure vessel's MAWP and that valve does not relieve at a pressure greater than the vessel's MAWP	46 CFR 61.10-5 (i)
	<input type="checkbox"/> Ensure safety or relief valve relieves at a pressure not more than 10% above or below the valve's marked pressure	46 CFR 54.15-10 (a)
		46 CFR 54.15-10 (g)

Service	Working Pressure	Relief Valve Setting	Date Tested or Examined

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.7	<input type="checkbox"/> Ensure that exhaust pipe systems cooled by water are:	
	<input type="checkbox"/> Provided with cooling water obtained from the engine cooling system or from a separate engine driven pump.	46 CFR 182.425 (b)(1)
	<input type="checkbox"/> Fitted so that cooling water is injected into the exhaust system as close as possible to the engine exhaust manifold and so that water passes through the entire length of the exhaust pipe.	46 CFR 182.425 (b)(2)
	<input type="checkbox"/> Fitted with insulation or be water-jacketed between the exhaust manifold and the point of cooling water injection.	46 CFR 182.425 (b)(3)
	<input type="checkbox"/> Either water-jacketed or insulated, if a vertical exhaust pipe, to ensure no water is mixed with exhaust gases.	46 CFR 182.425 (b)(4)
	<input type="checkbox"/> Provided with a suitable warning device, visual or audible, installed at the operating station to indicate any reduction in water flow when the cooling water is provided from a source other than the engine cooling water system.	46 CFR 182.425 (b)(5)
	<input type="checkbox"/> Provided with a suitable strainer in the intake line.	46 CFR 182.425 (b)(6)
		46 CFR 182.430 (b)
		46 CFR 182.15-20 (a)
10.8	<input type="checkbox"/> Ensure there are two independent means to control speed and direction of rotation for each propulsion engine (not required for vessels with multiple propulsion engines with independent control for each engine).	46 CFR 184.620 (a)

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.09	<input type="checkbox"/> Ensure there is a fixed means of two-way communications from the operating station to the location of the means to control the engine (not required for multi-engine vessels with pilothouse controls for each engine). <input type="checkbox"/> Two-way communications may be satisfied with handheld portable radios or, if locations are sufficiently close together, with direct voice communications (test while underway at full power).	46 CFR 184.602 (a)
10.10	<input type="checkbox"/> Ensure machinery and boilers for steam and electrically propelled vessels comply with subchapter F (Marine Engineering) and subchapter J (Electrical Engineering).	46 CFR 182.220 (b)

Notes:

Task 10: Machinery and Auxiliary Machinery (Continued)

Step	Action	Ref
10.11	<input type="checkbox"/> Inspect auxiliary machinery. <input type="checkbox"/> Ensure heating boilers are tested or examined every 3 years <input type="checkbox"/> Ensure water heaters comply with 46 CFR Parts 53 & 63 except: <input type="checkbox"/> Electric water heaters rated at not more than 100 psi and 250°F are acceptable if: <input type="checkbox"/> Capacity ≤ 120 gallons; <input type="checkbox"/> Heat input ≤ 200,000 Btu per hour; <input type="checkbox"/> UL listed (UL 174 or UL 1453); AND <input type="checkbox"/> Protected by pressure-temperature relief device	46 CFR 182.310 46 CFR 182.310 (c) 46 CFR 182.320 (a) & (b) 46 CFR 182.320 (a)
10.12	<input type="checkbox"/> Ensure water heaters are installed and secured from rolling and movement.	46 CFR 182.320 (c)
10.13	Inspect boilers. <input type="checkbox"/> Ensure machinery of steam or gas turbine type, auxiliary boilers, and heating boilers comply with subchapter F (Marine Engineering) <input type="checkbox"/> Verify boilers including associated piping and fittings meet applicable requirements of subchapter "F". <input type="checkbox"/> Inspect boiler safety valves. <input type="checkbox"/> Ensure no flex hose is used from the F/O pump to the burner. <input type="checkbox"/> Test boilers	46 CFR 182.310(c) MSM Vol. II B1-G NVIC 11-92 46 CFR 61.15-5 NVIC 1-71 46 CFR 61.05-10G 46 CFR 61.05-10
10.14	<input type="checkbox"/> Ensure unfired pressure vessels comply with subchapter F (Marine Engineering).	46 CFR 182.330

Notes:
