Ship Name: AGRI MARINA
Flag: Panama
IMO Number: 9442938
Date of Action: 3/22/2019
Action Taken: Detention
Port: Portland, Oregon
Unit: MSU Portland (OR)

Deficiencies: Code - Category
02199 - Other (Structural condition) The machinery, boilers and other pressure vessels, associated piping systems and fittings shall be of a design and construction adequate for the service for which they are intended. Piping on the vessel's salt water cooling system has approximately 10 leaks with temporary repairs made by the crew without approval of the vessel's classification society.

15109 - Maintenance of the ship and equipment The company should establish procedures to ensure that the ship is maintained in conformity with the provisions of the relevant rules and regulations and with any additional requirements which may be established by the company. Objective evidence during an expanded ISM exam revealed the crew was not following the ship’s procedures with regard to testing steering gear alarms. In addition, the crew failed to notify the ship's technical superintendent with regard to the temporary repairs on the salt water cooling piping and hydraulic leaks on the steering gear. In accordance with the ship's SMS, the technical superintendent shall be notified when machinery defects cannot be rectified. It is recommended that an external third party audit of the SMS be conducted with regard to deficiencies No. 1 and No. 3.
