<tr>
<td>07109 - Fixed fire extinguishing installation</td>
<td>Fire-fighting systems and appliances shall be kept in good working order and readily available for immediate use. The fixed CO2 fire-fighting system was found with a branch line not connected to a CO2 bottle to the discharge manifold and several places where the branch lines were chaffed with wire braiding exposed.</td>
</tr>
<tr>
<td>15109 - Maintenance of the ship and equipment</td>
<td>The company should establish procedures to ensure that the ship is maintained in conformity with the provisions of the relevant rules and regulations and with any additional requirements which may be established by the company. Objective evidence during an expanded ISM exam revealed that the crew was not accurately following the ship's procedures with regard to the inspecting of the CO2 bottle storage room. It is recommended that an external third party audit of the SMS be conducted with regard to deficiency No. 1.</td>
