Description

In meeting these requirements, the company should ensure that: inspections are held at proper intervals; any non-conformity is reported, with its possible cause if known; appropriate corrective action is taken; and records of these activities are maintained. Objective evidence discovered during an expanded ISM exam revealed that the vessel failed to properly maintain and inspect equipment, report non-conformities, and follow onboard procedures required by the SMS and PMS as seen by the following deficiencies. An external third party audit is required prior to being released from detention.
