The Mailboat Co Ltd

CAT ISLAND MAIL COMPANY LTD.

Deficiencies: Code - Category

15107 - Emergency preparedness

Description

The Company should identify potential emergency shipboard situations, and establish procedures to respond to them. Since the emergency diesel generator is located in the main machinery space, the SMS does not address how to respond to a loss of power in the event of a machinery space casualty (fire, flooding, etc.) that renders the emergency diesel generator inaccessible. This causes a single point of failure that presents an unacceptable risk to the crew, vessel, and the environment. An external ISM audit is required.
