Marine Inspector's Name:	Signature:	Unit:	Date:
Notes: 1. See NVIC 11-93 Change 3 to determine tonnage system applicability. 2. If the ITV is less than 79 feet, use GRT for applicability - unless otherwise provided for by the international convention. 3. If the ITV build date AND the requirement effective date is BEFORE 18JUL1994 use GRT for applicability. 4. If the ITV build date AND/OR the requirement effective date is ON or AFTER 18JUL1994 use GT ITC for applicability. 5. Use GT ITC for applicability irrespective of build date. 6. If the ITV build date is BEFORE 18JUL1994 use GRT for applicability. 7. For application of STCW requirements 200 GRT is equivalent to 500 GT ITC.			

8. To facilitate the operation of the U.S. maritime industry, upon request, an SMD and/or ISSC can be issued to a U.S. flag vessel even when an international convention does not apply to the vessel. This is highly recommended for ITVs that engage in foreign voyages.
