MSIB Cancellation: United States Coast Guard cancels **MSIB 015-16**

This bulletin formally cancels MSIB 015-16 dated December 9, 2016, regarding recommendations from the National Offshore Safety Advisory Committee (NOSAC) on Safety Management Systems for Vessels Conducting OCS Activities. NOSAC issued its final report to the U. S. Coast Guard in the fall of 2016. The final report recommended the use of a Safety Management System for entities engaging in well intervention activities on the U.S. Outer Continental Shelf. Since the release of the MSIB, the use of Safety Management Systems by entities engaged in OCS activities, like well intervention, has become common place across the OCS community. As such, this MSIB is being cancelled as it is no longer needed.
