

Best Practice: Hotline Phone

Category:	Communications
Location:	Limassol, Cyprus
Date Observed:	June 2007
POC:	Not available
WWW:	http://www.cpa.gov.cy/

Description: A “Hotline Phone” immediately connects personnel located at key points in the port.

Discussion: The Port Facility Security Officer established a “Hotline Phone” that connects directly to all the port’s gates, the PMP station, and the VTMISS station. This “Hotline Phone” facilitates the immediate communication of security information to personnel located at key points in the port.

Potential Down-side: No potential downside is found with this practice.

Conclusion: A simple solution to communicate security information quickly to other personnel within the port.

Cost: A relatively low cost measure to implement.
