

## **Best Practice: Concrete Base for Fencing**

**Photo Unavailable**

**Category:** Security Infrastructure

**Location:** Puerto Cabello, Venezuela

**Date Observed:** December 17, 2004

**POC:** Best Practice point of contact & contact information, if available.

**WWW:**

**Description:** The fencing surrounding the perimeter.

**Discussion:** The fencing surrounding the facility perimeter is set in concrete. The concrete makes it very difficult for anyone trying to gain access to the facility underneath the fence.

**Potential Down-side:** None.

**Conclusion:** The construction of the fence at the facility adds an extra measure of security by making it extremely difficult for persons to dig under the fence line to gain access.

**Cost:** The initial cost of constructing the fence would be high.
