

**Best Practice: Signage**

**Category:** Security Infrastructure  
**Location:** Fosfertil, Santos, Brazil  
**Date Observed:** September 2005  
**POC:** Mr. Gilberto Tiago  
Operations Superintendent,  
LocalFrio

**Description:** Signs posted throughout the facility identify the color of access control badges allowed in that area.

**Discussion:** Security guards are able to easily verify if an employee has authorization to be in an area by comparing the colors on the building's signs and the employee's access card.

**Potential Down-side:** None.

**Conclusion:** Signs provide an easily recognized control area for security guards.

**Cost:** The initial cost of signs is relatively inexpensive.
