

## **Best Practice: Port Security Training**

Picture Not Available

**Category:** Training and Procedures  
**Location:** Exxon Mobil Terminal & Refinery - Port of Rotterdam, Netherlands  
**Date Observed:** November 28, 2006  
**POC:** Mr. Dirk Griffioen, Supervisor Security and Fire Protection, PFSO, +31 10 487 44 47  
**WWW:** [www.portofrotterdam.com](http://www.portofrotterdam.com)

**Description:** Exxon Mobil developed a corporate-wide, web based indoctrination ISPS course for all of its employees. This course is accessible via the intranet so that employees can access the training at their worksite or when traveling abroad.

Exxon Mobil developed a video presentation on port security and distributed it globally to all of its facilities.

**Discussion:** Exxon Mobil developed the corporate-wide ISPS course to provide a standard curriculum for all of their employees. Web based training ensures all employees have access to the training via the intranet. The video presentation provides a standard presentation on port security, which is viewed by all employees and visitors at all Exxon Mobil facilities.

**Potential Down-side:** Exxon Mobil is a large company with thousands of employees. Corporate policy regarding port security and ISPS Code implementation could be compromised without this standard training curriculum.

**Conclusion:** Exxon Mobil developed a corporate-wide web based training and video presentation to enhance port security awareness training for all of its employees worldwide.

**Cost:** Costs associated with developed of a standard web based training curriculum, and coast associated with development and distribution of a video presentation.
