Mariner Credential Application Inventory is the total number of applications in the Mariner Credentialing Program that are currently being processed. The NMC has set a goal of 9000 applications or less in the system at any given time. Backlog of Applications refers to the number of applications in excess of that goal.

Current Inventory = 2011

Mariner Credential Application Throughput is a ratio of the total number of applications finished divided by the total number of applications received. The NMC has set a throughput goal of 1.0 or greater. The total number of credentials received and credentials issued, denied, withdrawn, and timed out are included in this measurement.

Current Throughput = 1.02

Mariner Credential Processing time is measured in terms of overall processing time (application submitted date to issued date) and net processing time (NPT). NPT is the total time the Coast Guard spends processing the application and does not include time waiting for information from mariners. The NMC has set a net processing goal of 30 days.

Current NPT = 12.05

** 94% of credentials are produced within 30 days NPT. **

The National Maritime Center is an ISO 9001:2008 Compliant Organization.
